

1. If I am an investor without an agricultural background, how can I participate in Nawodhan?

Nawodhan provides support for non-agricultural investors by offering agricultural expertise, technical assistance, and management guidance through KABCO and partners to ensure successful participation.

2. What happens if a farmer or landowner breaches the agreement?

In case of a breach, the agreement terms would dictate the next steps. Usually, a penalty clause or compensation is involved, and KABCO may assist in resolving disputes between parties.

3. What is the process if a farmer or landowner wants to discontinue the agreement?

If a party wishes to discontinue, they must follow the exit terms in the agreement. Depending on the contract, either party might be required to compensate for losses or notify a specified period in advance.

4. Can I get land for more than 15 years?

Yes, it may be possible, depending on the specific agreement terms and regulations in your area. Longer leases can be negotiated, especially with private landowners.

5. Can I get details of government land?

Yes, government land details can be obtained through appropriate channels, such as government land registries or departments involved in land allotment.

6. What is KABCO's role and benefit from this project?

KABCO plays the role of a facilitator, providing technical support, market access, and assistance with regulatory compliance. Their benefit comes from offering consultancy and support services to participants in the project.

7. What is the structure of KABCO?

KABCO is structured as a consultancy and facilitation entity that connects investors, farmers, and landowners with opportunities and resources for sustainable agriculture.

10. Who conducts land feasibility studies?

Land feasibility studies are conducted by experts in soil science, hydrology, and agronomy, often hired by KABCO or third-party consultants.

11. Who provides guidance on technical aspects?

Technical guidance is provided by KABCO's team of experts, agricultural consultants, Department officials and agronomists who assist in crop selection, soil management, and farm planning.

12. Is soil testing mandatory?

Yes, soil testing is highly recommended to determine the suitability of the land for specific crops and to enhance productivity.

13. Is insurance mandatory?

Insurance may not be mandatory but is strongly recommended to protect against risks like crop failure, natural disasters, and other liabilities.

14. Who selects the crop?

Crop selection is typically done collaboratively by the farmer, landowner, and KABCO experts, based on market demand, soil suitability, and climate. However farmer will be given freedom to select crop.

15. Is there assistance in supplying quality planting materials?

Yes, KABCO can assist in sourcing high-quality planting materials, often partnering with certified suppliers and nurseries.

16. Can we import planting materials from abroad?

Yes, importing planting materials is possible, but it requires adherence to regulatory approvals and quarantine requirements.

17. Can we get machinery through this project?

Yes, KABCO can assist in sourcing and acquiring agricultural machinery required for different farming processes.

18. Can we get help from Karmasena?

Yes, Karmasena can assist with agricultural labor and technical support as needed.

19. Where do we submit the SLA?

The SLA can be submitted to the concerned authority in KABCO or the project office handling agreements.

20. Is one-time registration enough?

Yes, generally, one-time registration is sufficient unless specific renewals or changes in the project scope require additional registration.

21. If I cultivate a high-value crop, do I get any scheme assistance?

Yes, cultivating high-value crops may qualify for scheme assistance under government programs like MIDH or state-level agriculture development programs.

22. Can I get credit from a bank?

Yes, bank credit is available for agriculture projects, often facilitated through NABARD, agricultural development banks, or commercial banks with agri-lending programs.

23. What schemes are available through MIDH, SHM, or the agriculture department?

Various schemes such as subsidies for drip irrigation, greenhouse construction, and post-harvest management are available through MIDH, SHM, and the agriculture department.

24. Can I get export data on international demand for different fruits?

Yes, export data can be obtained from export promotion councils, trade organizations, and government agencies involved in trade and commerce.

25. Can we meet exporters or buyers?

Yes, KABCO can help connect you with exporters and buyers through organized meets, trade fairs, or business platforms.

26. Does KABCO assist in exporting?

Yes, KABCO can provide support in understanding export regulations, documentation, and market linkage for international trade.

27. What is GAP cultivation?

GAP (Good Agricultural Practices) cultivation refers to farming practices that ensure food safety, environmental sustainability, and adherence to quality standards.

28. Who verifies for export?

Export verification is done by certifying agencies approved by the government, such as APEDA or other export promotion councils.

29. Where do we get an export license?

Export licenses can be obtained from the Directorate General of Foreign Trade (DGFT) or other relevant authorities handling agricultural exports.

30. Are there any common processing centers for value addition?

Yes, KABCO can provide information about common processing centers where value addition activities like packaging, sorting, and grading can be done.

31. Where can we get details of value addition?

Information on value addition processes can be obtained from agricultural extension services, KABCO consultants, or specialized agro-processing units.

32. Where can I find information on packing and primary processing?

Information on packing and primary processing can be found through agricultural development departments, packaging technology institutes, or KABCO's consultancy services.

33. What are GI crops?

GI (Geographical Indication) crops are those which are grown in specific regions and have qualities or a reputation unique to that area, such as Darjeeling Tea or Nagpur Oranges.

34. Can we sell our produce to malls like Lulu Mall?

Yes, KABCO can help connect you with retail outlets and malls like Lulu Mall for selling produce, provided the necessary quality standards are met.

35. What are banned pesticides?

Banned pesticides are those that have been prohibited by the government due to their harmful effects on health and the environment. A list can be obtained from the agriculture department or regulatory bodies.

36. Can we get drone pesticide application services?

Yes, drone pesticide application services can be facilitated through schemes and KABCO's network of service providers.

37. Are there any schemes related to drones?

Yes, certain government schemes promote the use of drones for precision farming and pesticide application, and subsidies may be available for purchasing drones. KABCO can avail information for you regarding this.

38. Can we get in touch with KAU experts for support?

Yes, KABCO can help connect you with Kerala Agricultural University (KAU) experts for technical advice and support.

39. Can we get a Soil Health Card and what is the procedure?

Yes, Soil Health Cards can be obtained by submitting soil samples for analysis through government-approved labs, often with support from KABCO or Krishibhavadans.

40. How do we take soil samples and where should they be submitted?

Soil samples should be taken following standard guidelines (sampling depth, location, etc.) and submitted to government-authorized soil testing laboratories. KABCO can guide you through this process.

41. Are there any insurance schemes available?

Yes, there are various insurance schemes such as the Pradhan Mantri Fasal Bima Yojana (PMFBY), which provide coverage for crop loss due to natural disasters, pests, and other risks.

42. Is KERA integrated with Nawodhan?

Yes, KERA (Kerala State Electricity Board) might have connections with Nawodhan for power supply in the case of electricity-dependent agricultural activities like irrigation.

42. Can we get details of farmers doing precision farming, hydroponics, or aquaponics?

Yes, KABCO can provide connections to farmers who are experienced in precision farming, hydroponics, or aquaponics.

43. What is VFPC?

VFPC (Vegetable and Fruit Promotion Council Kerala) is an organization that promotes the cultivation and marketing of vegetables and fruits in Kerala.

44. Can we get seed details and rates from VFPC?

Yes, VFPC provides detailed information on seeds, planting material, and current rates for farmers.

45. Is there an online platform for seed purchases?

Yes, VFPC and other agricultural platforms offer online purchasing options for seeds and planting materials.

46. Can I get details of the Kathir app?

The Kathir app is a mobile and web platform that provides information on agricultural practices, market prices, and farmer schemes.

47. What is climate-smart agriculture?

Climate-smart agriculture refers to farming practices that increase productivity, resilience to climate change, and reduce greenhouse gas emissions.

48. Are there climate-resilient vegetable varieties available?

Yes, research institutions and agricultural departments have released climate-resilient vegetable varieties suitable for different regions.

49. Can I access weather forecasts?

Yes, Kathir app provide up-to-date weather forecasts to assist in farm planning.

50. Can I get yield predictions?

Yield predictions can be provided through advanced agricultural analytics and historical data, often supported by KABCO or Department

51. Is logistic help available?

Yes, KABCO can assist in arranging logistics for transporting produce to markets or processing centers.

52. Are there startups that can help with my project?

Yes, various agri-tech startups are involved in supporting agriculture projects with innovations in technology, supply chain, and market linkages.

53. How can I register as a startup?

You can register as a startup through government platforms like Startup India, or with the support of KABCO if you meet the criteria for agricultural startups.

54. Are there any startup schemes?

Yes, there are several startup schemes such as seed funding, incubation support, and technical assistance available through government and private entities.

55. What is FPC?

FPC (Farmer Producer Company) is a legally registered entity formed by farmers to collectively undertake agricultural activities like production, processing, and marketing to improve their bargaining power and market reach.
