2: Process for OP billing Service Billing Advanced

Description: Steps: 7 | Page • Select the file type of patient. It could be OP, IP, new or an outsider. For a new patient, click on 'F4' to load the registration screen. For an outsider, click on the button near file type for loading/entering the patient details. For an existing patient, details can be searched by providing document ID, mobile number, name etc. • By entering the file number, patient details will be loaded. By clicking on the patient's name button, patient profile can be viewed. Last visit details of patient will also be displayed on the screen. • To verify the eligibility of patient's insurance coverage, click on 'Elig. Discovery' button. Eligibility status of patient along with the available coverages and benefits will be displayed. Eligibility numbers can also be manually provided in an "Elig" box. • Choose consultation or service for billing from the service list. • For consultation billing, once a doctor is selected, the available slot times automatically populate based on the doctor's schedule. If the schedule is not assigned to the doctor, the patients would be placed in a queue. • For billing services like laboratory, radiology items, select the item code or name from the list and click on the "Add" button. These added items will be displayed on the grid below. • Select the payment category and allocate the cash/credit scheme to the patient. (F7- credit facility and F9 – cash facility). • On click of 'Prv Card', all the available privilege cards associated with the patient will be displayed along with the utilization details. Double click on the card for utilization. • When a referral for a patient is requested by doctor, the details will load on "EMR Ordered" in left side of the form. Upon clicking to bill, the system automatically loads the details of the referred doctor into the appropriate fields.

3: Process for OP billing Service Billing Advanced

Description: Process for OP billing Service Billing Advanced For viewing all the appointments for today, click on the button near 'Appointment no'. Double click on the appointment number, then the patient, doctor and token booked details will automatically be loaded. • When a patient comes through referral from outside, change the patient category to 'Referral'. Referral Preauthorization number and dates can be entered in the appropriate fields. Referral document can be uploaded on click of 'Referral' button. • To associate any discount profile with patient's bill, select the details from 'Reference' field and then click on 'Apply' button. A discount will be automatically applied on the bill. • Depending on the payment category selection, credit bill and cash bill details will be automatically loaded on the right side of the form. The payment amount is calculated by considering VAT, deductions, discounts and advance payments. • On the left side of the screen, patient's allocated claim and visit-related limits will be displayed, including details such as the claim limit, availed amounts, deduct limit, deduct billed amount, and deduct balance amount. (Refer: Credit Scheme under insurance module). • Pay status in 'Cash bill details' can be changed to paid or unpaid status.
