

2. **Category**

This field is used to specify the category of the patient.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Cash, Insurance, Corporate

3. **Service**

This field is used to specify whether the billing is for 'Consultation' or 'Services'.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Consultation, Services

4. **File No**

This field is used to enter the file number of the patient. For manual entry just need to enter digits only (except zero) and press enter key, remaining characters will be filled automatically. For eg: type 223823, and press enter key, it will change to 000223823L.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	000223823L

5. **ID#**

This field is used to display the document value of the patient.

Input Type	Value Type	Rules/Validation	Example
Auto Set	Text	Nil	1013225162

6. **Elig.Discovery**

This button is used to check the eligibility of the patient for billing the services under an insurance.

Input Type	Value Type	Rules/Validation	Example
Button Click	Click	Nil	Eligible, Not Eligible

7. **Scheme**

This field is used to specify scheme name for billing the service under an insurance.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	/ALHUSSAINI AND AL YAHYA INVESTMENT GROUP/SL/B

8. Prv.Card

This button is used to view privilege card utilization details.

Input Type	Value Type	Rules/Validation	Example
Button Click	Text	Nil	Salamatak Abeer Card

9. Elig.

This field is used to enter the eligibility number received from nphies for billing the services under a particular insurance company.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Numeric	Insurance parameter- Enable Manual Entry of Eligibility No, Is Eligibility No Mandatory	1546657575

10. Dept.

This field is used to specify the department code and name.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	04 – General Surgery, 16 – Cardiology

11. Doctor

This field is used to specify the doctor code and name.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	20000 – ABDUL

12. Appointment No

This field is used to enter the appointment number of the patient. For manual entry just need to enter digits only (except zero) and press enter key, remaining characters will be filled automatically. For e.g.: type 116, and press enter key, it will change to APS-000000116L.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	APS-000000116L

13. Consultation Type

This field is used to specify the consultation type.

Input Type	Value Type	Rules/Validation	Example
------------	------------	------------------	---------

Selection	Text	Nil	Normal OP, Home Visit, Salamatak Visit, Free
-----------	------	-----	--

14. Slot

This field is used to specify the shift of the doctor.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Shift A, Shift B, Shift C

15. Token

This field is used to enter the token number.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	1C, 3B

16. Approval No

This field is used to enter the approval number received from the insurance company for the services that to be billed only by the approval status of insurance company.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	65435367

17. Complaint

This field is used to enter the complaints of the patient.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Delayed Diagnosis

18. Communication Mode

This field is used to specify the communication mode of the patient.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	Direct Visit

19. Referred Doctor

This field is used to specify the doctor if the patient came through the reference of another doctor.

Input Type	Value Type	Rules/Validation	Example
Button Click	Text	Nil	14426 – AHMED

20. Patient Category

This field is used to specify the category of the patient.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Normal, Referral, Emergency

21. Ref.Preauth.Date

This field is used to specify the reference preauthorized date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Date	Insurance master parameter - ReferralPreauth# & ReferralPreauthDate mandatory for referral consultation	10 - Jul - 2024

22. Ref.Preauth#

This field is used to enter the preauthorization number of the patient if the patient came through a referral outside centre.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Numeric	Insurance parameter - ReferralPreauth# & ReferralPreauthDate mandatory for referral consultation	76435356

23. Ref.Preauth From

This field is used to specify the reference from a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Date	Nil	29 - Jul - 2024

24. Ref.Preauth To

This field is used to specify the reference up to a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Date	Nil	31 - Jul - 2024

25. Reference

This field is used to enter the reference, if the patient is coming to hospital through outside reference such as outside clinic, outside hospital etc.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Configuration settings - Survey details are mandatory for billing(Y/N)	Profile – 101 AL- Hamra Hospital

26. Remarks

This field is used to enter the remarks, if any.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Billing for patient

Process

The screenshot displays the HELPBO software interface for patient billing. At the top, there are fields for Patient ID, Insurance, and various billing amounts. The 'Credit bill details' section shows a total of 103.50, and the 'Cash bill details' section shows a total of 10.00. The bottom of the screen displays a menu with options like 'Print Bill', 'Print Card', 'Bill From', and 'Print Receipt'.

http://staging.helpybo.com/media/products/Screenshot_2025-02-13_113115.png

- Select the file type of patient. It could be OP, IP, new or an outsider. For a new patient, click on 'F4' to load the registration screen. For an outsider, click on the button near file type for loading/entering the patient details. For an existing patient, details can be searched by providing document ID, mobile number, name etc.

- By entering the file number, patient details will be loaded. By clicking on the patient's name button, patient profile can be viewed. Last visit details of patient will also be displayed on the screen.
- Select the category.
- Upon entering the patient file number, all services ordered by the doctor will automatically populate on the screen, with each service and its corresponding amount displayed in a grid. If any service requires approval, its status will be indicated, and there will be an option to switch from credit (CR) to cash (CA) for insurance patients, with the ability to delete any services which are not required for billing.

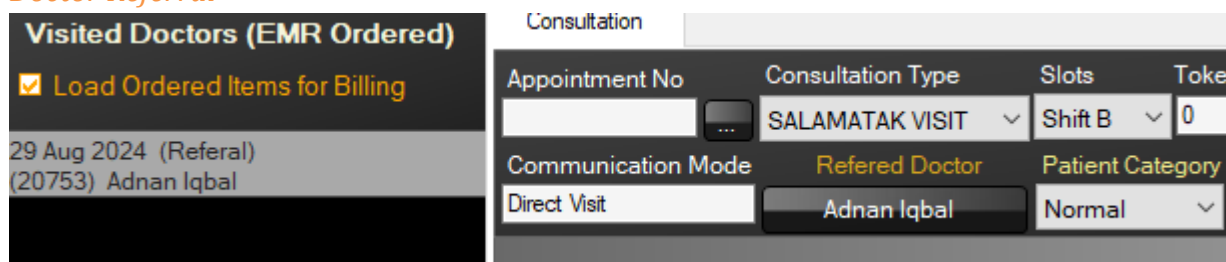

Billing Against Doctor Orders

The screenshot displays a medical billing application window. At the top, there are fields for 'File No.' (0000112943), 'Doc' (0000), and 'Elig. Discovery' (Token Call). Below this, a 'Service' list is shown with columns for Code, Name, Actual Amt, Disc, Bill Amt, Count, Total Amt, and Debt. The list includes items like 'S400-LAB - HSG-WL', 'H222-LAB - CBC-C', 'Radiology', and 'D503-ARTS - X-RAY O'. To the right, a 'Credit bill details' section shows 'Actual' (199.00), 'Disc' (3.00), 'Disc Amt' (66.50), 'Net Amt' (132.50), and 'Total' (132.50). Below this, a 'Cash bill details' section shows 'Actual' (0.00), 'Disc' (0.00), 'Disc Amt' (0.00), 'Net Amt' (0.00), and 'Total' (0.00). At the bottom, there is a 'Payment' section with fields for 'Payment' and 'Payment Date'.

- For allocating credit facility to a patient click on F7, a pop -up screen will be displayed for entering the insurance details.
- For allocating cash facility to a patient click on F9, a pop -up screen will be displayed for entering the cash policy details.
- For an insurance patient eligibility will be mandatory. To verify the eligibility of patient, click on 'Elig. Discovery' button. Eligibility status of patient along with the available coverages and benefits will be displayed. Eligibility numbers can also be manually provided in an "Elig" box.
- Choose consultation or service for billing from the service list.
- For consultation billing, once a doctor is selected, the available slot times automatically populate based on the doctor's schedule. If the schedule is not assigned to the doctor, the patients would be placed in a queue.
- For billing services like laboratory, radiology, minor procedure, package etc. enter the item code or name and select the item from the list and click on the "Add" button. These added items will be displayed on the grid below.
- On click of 'Prv Card', all the available privilege cards associated with the patient will be displayed along with the utilization details. Double click on the card for utilization.

- When a referral for a patient is requested by doctor, the details will load on “EMR Ordered” in left side of the form. Upon clicking to bill, the system automatically loads the details of the referred doctor into the appropriate fields.

- For viewing all the appointments for today, click on the button near 'Appointment no'. Double click on the appointment number, then the patient, doctor and token booked details will automatically be loaded.
- When a patient comes through referral from outside, change the patient category to 'Referral'. Referral Preauthorization number and dates can be entered in the appropriate fields. Referral document can be uploaded on click of 'Referral' button.
- Depending on the category selection, credit bill and cash bill details will be automatically loaded on the right side of the form. The payment amount is calculated by considering VAT, deductions, discounts and advance payments.
- Various discounts can be applied for the patients like user-wise limit discount, date-wise discount.
- If any billing user has the privilege to give a discount, the discount can be applied on the billing screen up to the limit specified for that particular user.
- If any date wise discount is present for a patient against any service patient date wise discount can be applied.
- To associate any discount profile with patient's bill, select the details from 'Reference' field and then click on 'Apply' button. A discount will be automatically applied on the bill.
- On the left side of the screen, patient's allocated claim and visit-related limits will be displayed, including details such as the claim limit, availed amounts, deduct limit, deduct billed amount, and deduct balance amount. (Refer: Credit Scheme under insurance module).
- Pay status in 'Cash bill details' can be changed to paid or unpaid status.
- If the patient is requesting to hold the payment of a bill, select on "Est.Hold" an estimate number will be generated.

Estimate Hold

The screenshot shows a medical software interface with a patient's bill. The patient's name is 'Dr. Mohamed Gharib' and the bill number is '0000000000'. The bill is for 'Internal Medicine' and 'Dr. Mohamed Gharib' with a total amount of '90.00'. A pop-up message 'C-Med' is displayed in the center, stating 'Estimate will be cancelled with Estimate no: EST-0000000000'. The interface includes various buttons like 'Print Bill', 'Print Deduct Bill', 'Print Card', 'Print Sticker', 'Credit', 'Cash', 'History', 'Bill', 'Est Hold', 'Est Apprvl', and 'Est'. The 'Est' button is highlighted with a red box.

- When the patient is ready to make the payment, click on 'Estimate' button, estimated bills can be viewed and double click on estimated bill to make payment. "Est.Apprvl" can be applicable only for insurance patients and services can be billed only after the approval.

Estimate And Estimate Approval

The screenshot shows the same medical software interface as before, but with the 'Estimate' button highlighted with a red box. The 'Est' button is also highlighted with a red box.

- To generate a printout of the service and deduct bills, click on the 'Print Bill' and the 'Print Deduct Bill' checkboxes for the service and deduct bill respectively.
- To generate consultation card and sticker, click on the 'Print card' and the 'Print Sticker' checkboxes respectively.
- Click 'External' button in the form to select the appointments which are scheduled by the patients through the online portal.
- Click 'Ref.Bill' button in the form to download referred services from outside center.
- EMR orderings of the patient can be viewed on click of 'Emr' button.
- Referral letter of the patient can be added by click on the 'Referral' button
- Documents submitted by the patients can be added by clicking on the 'Scan' button.
- Cards submitted by the patients can be added by clicking on the 'CScan' button. (e.g.: - Insurance card)
- All the patient attached documents can be viewed on click of 'VScan' button. These can be printed, downloaded, and can be converted to PDF format,
- Click 'Credit' button and 'Cash' button to allocate cash and credit scheme to patients.
- Click 'History' button to view the patients' visit history.
- Either premium or normal priority can be assigned to the patient.
- To make a payment, click the 'Save' button. A pop-up will appear showing the payable amount details. Payments can be made using either cash or card, with the option to select either a credit

or debit card. A cash calculator is available to determine the amount of return cash. If the billed user selects the staff credit option, the bill amount will be marked as a debit from their salary account. Additionally, there is an option for the patient to contribute to charity if they choose to do so.

- A checkbox is placed near 'Consult SMS' for sending a thankful message to patient for the consultation.

Business Rules

- Membership number in 'Credit' scheme and 'Cash' scheme length is based on the parameter value set in the Master of Insurance/corporate - 'Is Membership No Mandatory'. (eg:- If the value of the length is set as '15' the membership number should be typed up to '15' digits.)
- Estimate billing checkbox is based on the parameter in configuration settings - 'Enable estimate billing in service billing advanced(Y/N)' (e.g.: - If the value of the parameter is 'Y' the estimate and the bill checkbox in the form will be enabled to make the bill estimate hold or estimate approve).
- Reference is based on the parameter in configuration settings- 'Survey details are mandatory for billing(Y/N)' (e.g.: - If the Value of parameter is set as 'Y' reference field will become mandatory for registration and if the value is 'N' the field will become non-mandatory).
- To enter the approval number is based on parameter in configuration settings- 'Enable approval number entry in service billing(Y/N)' (e.g.: - If the parameter value is set as 'Y' a field will be displayed in op service billing form to enter the approval number.)
- To enable OP advance is based on parameter in configuration settings - 'Enable OP advance (Clinic/Pharmacy) utilization in billing(Y/N)' (e.g.: - If the parameter value is set as 'Y' the advance amount will be loaded in bill details and if the value is 'N' the advance amount will not be loaded).
- To enable cash billing against a doctor after free days is based on parameter in con- 'Cash billing against a doctor after free days(No action-1 , Warn-2 , Block -3)' (e.g.:- If the parameter value is set as '1' no action will be taken , If the value is set as '2' a warning message will appear , If the value is set as '3' a block message will appear.)

- To enable alert package utilization while package billing is based on parameter in configuration settings – ‘Show package utilization alert while package billing(Y/N)’ (e.g.:- If the parameter value is set as ‘Y’ package utilization form will automatically load by billing a package bill , If the value as set as ‘N’ package utilization form will not load automatically.)
- Mandatory fields need to be filled for billing a service.
- Configuration settings: Cash Policy Privilege Card based on Group (1)/Branch (2)
- Print Consultation sticker is based on parameter in configuration settings- ‘Print Consultation Sticker for service billing(Y/N).
- Print Consultation card is based on parameter in configuration settings - ‘Print Consultation card(Y/N).
- Consult SMS based on the parameter in configuration settings ‘Enable thankful SMS for consulted patient (1-Automatic, 2- Manual, 3- Not in use)’.
- Configuration settings for block billing if previous day collection not submitted: Block Billing if previous day collection is not submitted (Y/N).
- Configuration settings for enabling charity collection: Enable Charity Collection(Y/N).

7. Utilized Status

This field is used to specify bills based on utilization status.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Utilized, not utilized

Process

Download Referred Services

http://staging.helpybo.com/media/products/Screenshot_2025-02-13_113841.png

After the results are ready and uploaded from the outside investigation centre the results can be downloaded from the referred centre. Before downloading user must map the referred service to the same service at the outside investigation centre. User must map it in interbranch item mapping. (**Refer: - Interbranch Item mapping**). After the services are mapped properly select the bill and click download.

- Registering the patient: If the patient is not already registered in this center, the user must register them by clicking on the new button registration form opens and saving a file number.
- Already registered patient: If the patient is already registered in the investigation center click on existing then then patient search will pop up and filter the patient based on registered document id.
- After registering the bill can be utilized.

Business Rules

- Referred items cannot be downloaded before mapping the tests.

Shortcut keys

- F3 / Alt+ C - Clear the input data in the fields.
- F8 / Alt+ L - Close the screen.
- F5 / Alt +D - Download the referred service.
- F7 / Alt +S - Show the details.

View – Download Referred Services

Date	Referral No.	Referred From	Document No.	File No.	Row	Edit	Download Status	Utilized Status

The referred bills can be viewed below the grid based on the filter download status, utilized status etc.

EMR Orderings

This form is used to view orders placed by doctors. It allows users to filter and search orders based on various criteria, including date, doctor, and file number. Additionally, users can filter orders by status, such as Billed and Pending, to facilitate efficient order management and tracking. This screen can be accessed by clicking 'Emr' button from the OP service billing screen,

EMR Orderings

#	Date	Doctor	Department	File No.	Patient	Min	Lab	Rad	Other	Total
---	------	--------	------------	----------	---------	-----	-----	-----	-------	-------

http://staging.helpybo.com/media/products/Screenshot_2025-02-13_114007.png

Input

The fields which are coloured in red in the document are mandatory fields.

1. From

This field is used to search the bills which are send to this external centre from a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker	Date	Nil	16-JUN-2024

2. To

This field is used to search the bills which are send to this external centre up to a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker	Date	Nil	25-JUN-2024

3. Doctor

This field is used to enter the doctor's name.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	Ahemed Saaad

4. File No

This field is used to enter the file number of the patient. For manual entry just need to enter digits only (except zero) and press enter key, remaining characters will be filled automatically. For eg: type 223823, and press enter key, it will change to 000223823L.

Input Type	Value Type	Rules/Validation	Example
Manual Entry/Auto set	Text	Nil	000223823L

5. Filter By

This field is used to filter the EMR orderings by billed and pending orders.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Billed, Pending orders

Process

EMR Orderings

#	Date	Doctor	Department	File No	Patient	Min	Lab	Rad	Other	Total

Depending on the input, the EMR orderings will be listed in the form. Doctor name, file no, Patient name, service orderings count etc. can be viewed in the form.

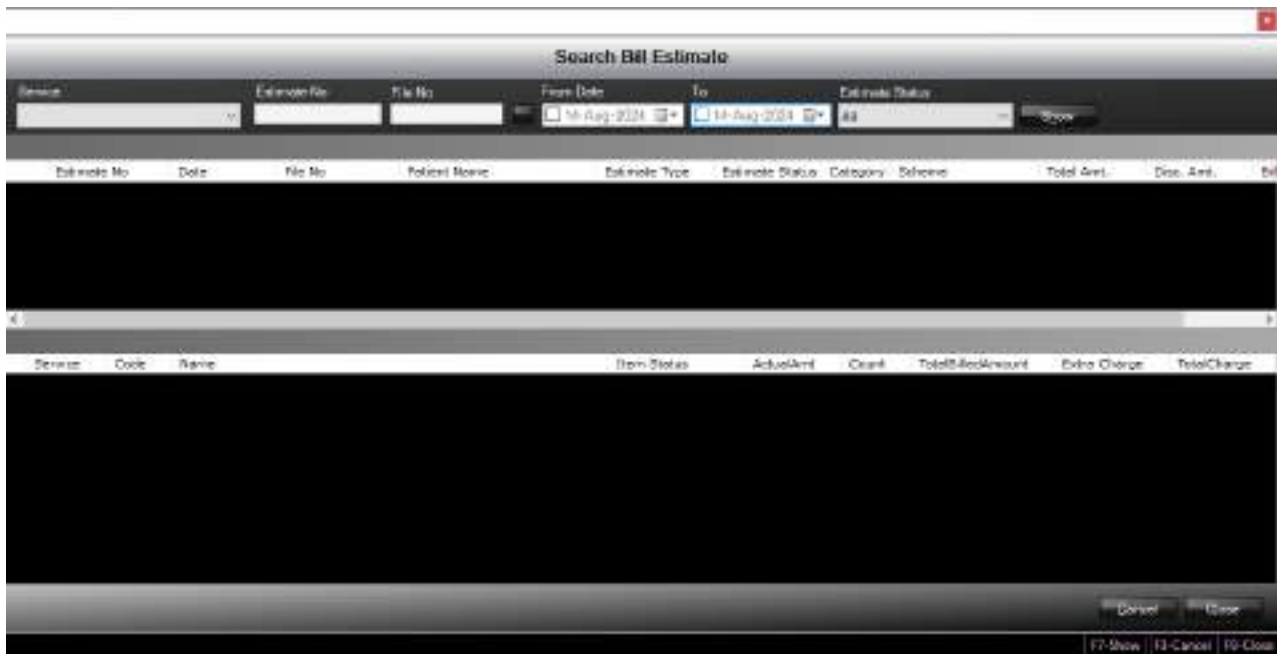

Shortcut keys

- F3 - Clear the input data in the fields.
- F7 / Alt+ S - Shows the EMR orderings.
- F8 / Alt+ L - Close the screen.

Estimate

This form is used to search the estimate bill. This screen can be accessed by clicking 'Estimate' button from the OP service billing screen.

Estimate

http://staging.helpybo.com/media/products/Screenshot_2025-02-13_114106.png

Input

The fields which are coloured in red in the document are mandatory fields.

1. Services

This field is used to specify the service type of the bill.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Radiology, Laboratory

2. Estimate No

This field is used to enter the estimate number.

Input Type	Value Type	Rules/Validation	Example
Manual Entry/Auto set	Text	Nil	EST - 000000224L

3. File No

This field is used to enter the file number of the patient. For manual entry just need to enter digits only (except zero) and press enter key, remaining characters will be filled automatically. For eg: type 223823, and press enter key, it will change to 000223823L.

Input Type	Value Type	Rules/Validation	Example
Manual Entry/Auto set	Text	Nil	000223823L.

4. From Date

This field is used to specify the estimate bill from a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Date	Nil	14 – Aug -2024

5. To

This field is used to specify the estimate bill up to a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Date	Nil	15 – Aug -2024

6. Estimate Status

This field is used to search the bills based on estimate status.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	All, estimate approved, Estimate rejected etc.

Process

Referral

This form is used to scan the patient document. This screen can be accessed by clicking 'Referral' button from the OP service billing screen,

Referral

Input

The fields which are coloured in red in the document are mandatory fields.

1. Device

This field is used to specify the name of device for scanning the document.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Desktop Scanners

2. Scan

This button is used to scan the document.

Input Type	Value Type	Rules/Validation	Example
Button clicks	Click	Nil	Photo copier

3. Load

This button is used to load the image from the system.

Input Type	Value Type	Rules/Validation	Example
Button clicks	Click	Nil	Document

4. FCAM

This button is used to click the image using front camera.

Input Type	Value Type	Rules/Validation	Example
Button clicks	Text	Nil	Image

5. BCAM

This button is used to click the image using back camera.

Input Type	Value Type	Rules/Validation	Example
Button clicks	Text	Nil	Image

6. Patient

This field is used to load the file number of the patient. A button is placed near 'Patient' for searching the patient. By searching the patient's name and double click on it, the patient will be loaded in the form and by click on its patient's profile can be viewed.

Input Type	Value Type	Rules/Validation	Example
Manual Entry / Auto Set	Text	Nil	002521624L

7. Card

This button is used to scan the document card using the selected device.

Input Type	Value Type	Rules/Validation	Example
Button clicks	Text	Nil	Insurance card

8. Description

This field is used to enter the description.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Document upload

9. Document Category

This field is used to specify the type of document.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Referral letter, Covid form, Police report etc.

10. File Name

This field is used to specify the file name.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Referral document

11. Value

This field is used to enter the document value.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	1023112103

12. IssuedPlace

This field is used to specify the document issued place.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Makkah

13. Issue Date

This field is used to specify the document issued date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Date	Nil	13 – Aug - 2024

14. Expiry Date

This field is used to specify the document expiry date.

Input Type	Value Type	Rules/Validation	Example
Date Picker with	Date	Nil	13 – Aug - 2030

Checkbox			
----------	--	--	--

15. Browse

This button is used to select the document from the system.

Input Type	Value Type	Rules/Validation	Example
Button Click	Text	Nil	Document

16. L & R

These two button are used to rotate the document image to left and right.

Input Type	Value Type	Rules/Validation	Example
Button Click	Click	Nil	Nil

17. Add

This button is used to add the browsed image.

Input Type	Value Type	Rules/Validation	Example
Button Click	Click	Nil	Nil

18. Clear

This button is used to remove the browsed image.

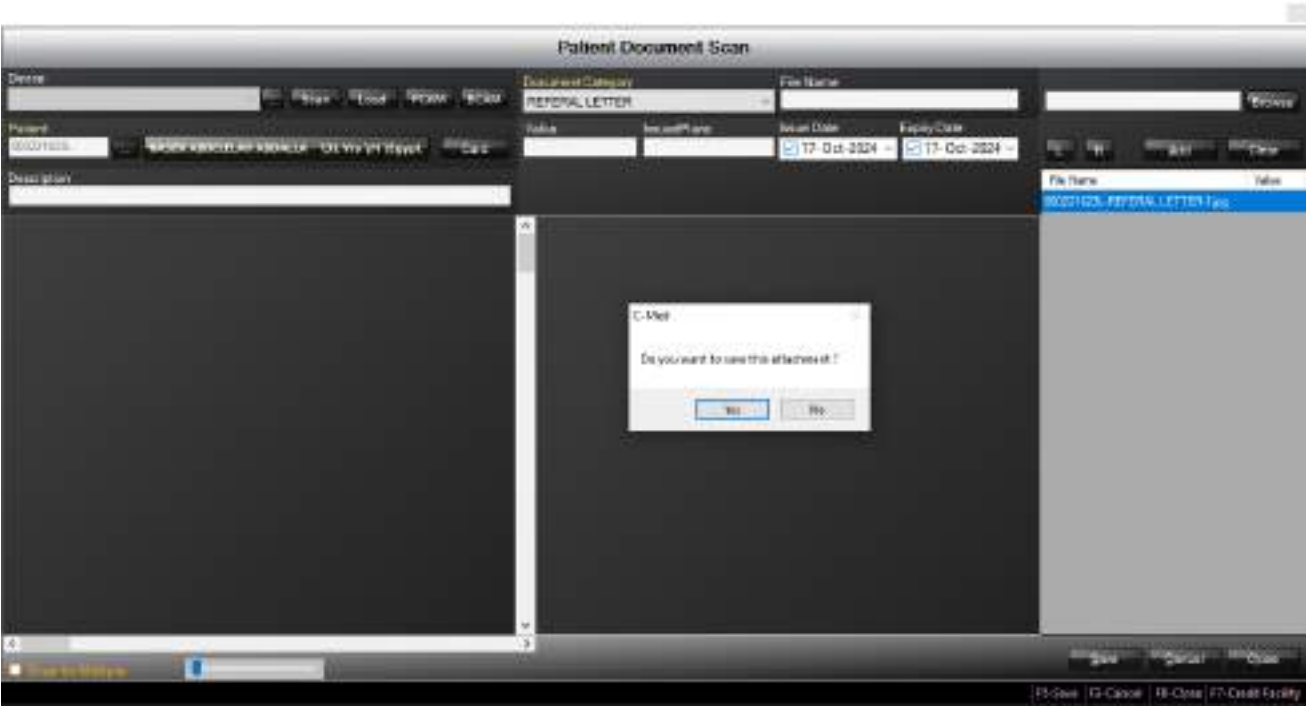

Input Type	Value Type	Rules/Validation	Example
Button Click	Click	Nil	Nil

Shortcut keys

- F5 / Alt+ S - Save the document.
- F3 / Alt+ C - Clear the input data in the fields.
- F8 / Alt+ L - Close the screen.
- F7 - Allocate credit facility to patient.

Successful Outcome

Referral- Patient Document Scan

http://staging.helpybo.com/media/products/Screenshot_2025-02-13_114243.png

VScan

This form is used to view the scanned documents of the patient. This screen can be accessed by clicking ‘VScan’ button from the OP service billing screen.

VScan

Input

The fields which are coloured in red in the document are mandatory fields.

1. **File No**

This field is used to enter the file number of the patient. For manual entry just need to enter digits only (except zero) and press enter key, remaining characters will be filled automatically. For e.g.: type 223723, and press enter key, it will change to 000223723L.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	000223723L.

Process

- By entering the file number, attached documents can be viewed. By clicking on a particular document category, the documents attached to it will be shown on the form.
- By clicking on patient' name, patients' profile can be viewed.
- By clicking on 'Download Image' the image of the document can be downloaded.
- By clicking on 'Convert Image to Pdf' image can be converted into pdf format.
- By clicking on 'Card Scan' to scan the submitting card.
- By clicking on 'Scan' to scan the document.
- By clicking on 'Print' the print of the document can be taken.

Shortcut keys

- F3 - Clear the input data in the fields.
- F8 / Alt+L - Close the screen.

VScan- Patient Attachments

This form is used to scan the cards submitted by the patients. (e.g.: -Insurance Card) This screen can be accessed by clicking 'CScan' button from the OP service billing screen.

<http://staging.helpybo.com/media/products/Screenshot 2025-02-13 114401.png>

Input

The fields which are coloured in red in the document are mandatory fields.

1. File no

This field is used to enter a file number, or it can be selected using the nearby button. For manual entry just need to enter digits only (except zero) and press enter key, remaining characters will be filled automatically. For e.g.: type 223823, and press enter key, it will change to 000223823L.

Input Type	Value Type	Rules/Validation	Example
Manual Entry/Auto set	Text	Nil	000223823L

2. Document Category

This field is used to specify the type of document.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Referral letter, Covid form, Police report etc.

3. File Name

This field is used to specify the file name.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Referral document

4. Value

This field is used to enter the document value.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	1023112103

5. Expiry Date

This field is used to specify expiry date of the card.

Input Type	Value Type	Rules/Validation	Example
Date Picker with Checkbox	Text	Nil	30/08/2024

6. Scheme

This field is used to specify the insurance scheme.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	ABAR HAIL WATER COMPANY/AXA/%BRONZE 300

Shortcut keys

- F1 - Focus patient file no.
- 1 - Iqama selection in document category.
- 2 - Insurance card selection in document category.
- F7 - Allocate credit facility to patient.
- F2 - Scan the card.
- F5 - Save the card scanned.
- F3 / Alt+A - Clear the input data in the fields.
- F8 / Alt+L - Close the screen.

Credit Scheme Allocation

This form is used to allocate credit scheme to patient. This screen can be accessed by clicking F7 button after entering the file number from the OP service billing screen.

Credit Scheme Allocation

The screenshot shows a software interface titled "Credit Scheme Allocation To Patient". It contains several input fields and buttons. The fields are organized into sections: Insurance, Corporate, Policy, Scheme, Issued No, Card Issued Firm, TPA, Membership No, Dependend No, Network, Policy Exp Date, Remarks, and buttons for Download, View, Save, Documents, Cancel, and Close. Below the form is a table with the following columns: Doc, S, Policy Code, Scheme Name, MemNo, Ded % (FlatRate), Max DedLimit, Network, PolNo, ExpDate, Scheme Code, Policy Name, Valid From.

http://staging.helpybo.com/media/products/Screenshot_2025-02-13_114401.png

Input

The fields which are coloured in red in the document are mandatory fields.

1. Insurance

This field is used to specify the insurance company name.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	Next Care Guarantee of payment

2. Corporate

This field is used to specify the corporate company name.

Input Type	Value Type	Rules/Validation	Example
------------	------------	------------------	---------

Searchable Selection	Text	Nil	Abar Hail Water Company
----------------------	------	-----	-------------------------

3. **Scheme**

This field is used to specify the scheme name. A button is placed near 'Scheme' to view the policy and scheme category. View button is used to view the credit scheme.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	ABAR HAIL WATER COMPANY/AXA/%BRONZE 300

4. **Iqama No**

This field is used to enter the iqama number.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Numeric	Nil	2529379212

5. **Policy No**

This field is used to specify the policy number.

Input Type	Value Type	Rules/Validation	Example
Auto set	Numeric	Nil	8567775

6. **Card Issued Frm**

This field is used to specify from where card issued from.

Input Type	Value Type	Rules/Validation	Example
Selection	Text	Nil	Makkah

7. **TPA**

This field is used to specify the third-party administrator's name.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	Globemed MOH

8. **Membership No**

This field is used to enter the membership number.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Numeric	Nil	758687980809097

9. Dependend No

This field is used to enter the depended number.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Numeric	Nil	75868776898009

10. Network

This field is used to specify the network.

Input Type	Value Type	Rules/Validation	Example
Searchable Selection	Text	Nil	MG1

11. Remarks

This field is used to enter remarks, if any.

Input Type	Value Type	Rules/Validation	Example
Manual Entry	Text	Nil	Scheme Allocated

12. From

This field is used to specify the expiry from a particular date.

Input Type	Value Type	Rules/Validation	Example
Date Picker	Date	Nil	12 – Aug -2024

13. Expiry Date

This field is used to specify the expiry date of the insurance card.

Input Type	Value Type	Rules/Validation	Example
Date Picker	Date	Nil	30 - Jul -2025

14. Policy Expiry Date

This field is used to specify the policy expiry date.

Input Type	Value Type	Rules/Validation	Example
Date Picker	Date	Nil	30 - Jul -2025
